WORK EXPERIENCE

ITURING.AI

Product Marketing Manager

Bangalore, India

March 2026 - Present

- Series A Decision Intelligence and Agentic AI company focused on BFSI. Joined as the first full time marketing hires - built the entire marketing function from ground up across the US, India, and South Africa.
- Built GTM infrastructure from zero:** Designed end-to-end outbound nurture framework, demand generation infrastructure, and marketing ops across 3 geographies with no inherited foundation.
- AI-powered marketing automation:** Architected two production-grade pipelines - a competitor intelligence system (Python + Apify + Internal SLMs), and a contact personalization engine routing prospects to tailored vs. blast sequences based on scraped signals.
- Owned SEO strategy and execution** - improved average search position from 19.8 to 9.7, grew impressions from 7k to 21k, managed technical SEO, keyword strategy and content briefs to drive organic growth across US, India, and South Africa. Achieved top-of-results visibility for target keywords in AI-powered search including ChatGPT.
- Multi-channel demand generation:** Owned outbound (email + LinkedIn + calls via Instantly and Apollo), events (US & India) and LinkedIn Ads and Google Ads.
- Product marketing and positioning:** Developed messaging, the product positioning spine, pitch decks, and sales collateral across 4 agentic product lines for banking, insurance, and collections verticals in the US and India.
- Pricing strategy:** Built multi-currency pricing configurator covering Platform Licence, Usage-Based, Outcome-Based, and Cost Saving Fee models.
- Exceeded MQL targets in India and South Africa by 15%** by identifying the right channel mix - LinkedIn outreach and industry events as primary India channels vs. the US founder-relationship motion.
- Owned GTM reporting to investors and Board - produced regular GTM performance briefs, competitive landscape updates, and pipeline forecasts for investor and Board-level reviews.
